

Electric Winch

Product Code: AVS-WIN

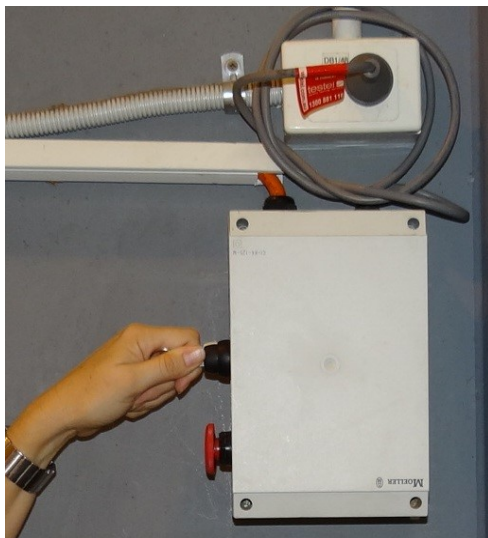

Designed specifically for use with Basketball and curtain systems, this electric winch uses time-tested materials and technology to provide a state-of-the-art winch for a lifetime of faithful, uninterrupted service.

At the core of the winch are high-strength metal gears. Metal gears consistently outperform other materials under strenuous conditions.

Basic cable care ensures a long, safe life, and this unit has precise machined grooves in the drum.

The limit switch make setting the limits a breeze for installers. Once set properly, the limit switch will not lose its critical settings due to vibration or environmental conditions.

The winch is also supplied with all required switching gear. The key can be removed from control box when not in use. Winch comes in a optional solid cover box and only requires a 240vx10 amp power outlet for operation. Options for keypad or hand held remote controls are available.
