

Competition Rugby Posts

Revision 2.0

18.2.11

We supply a range of Rugby League and Union posts for all requirements.

Systems are available in steel, aluminium and also fibreglass depending on requirements, and we can match to meet your needs in relation to strength or mobility.

Our systems can be seen at premier international stadiums, overseas venues and schools, as well as local council parks and primary venues.

Systems are all designed to ensure maximum safety for the public and installation crews, and are available with our pioneering hinged bases for added ease of removal in multisport venues.

Systems are available in a range of heights, generally ranging between 6—18 m, but we can customise on request, and supply either as a powder coated, or mill finish.

We can also supply a complete range of padding and scoreboards.

Contact us today for additional information.

Specifications may change without notice.
