

# ESSENTIALS DIVIDING CURTAIN

## INCLUSIONS

Mesh Top and Vinyl Bottom  
Electric Motor  
Limit Switch

## FEATURES

Custom made system with choice of colours and sizes

## PRODUCT CODE

CURT-ES

The Essentials dividing curtain is a "traditional" style system, but with many improvements designed to increase the durability and lower the maintenance requirements.

Essentials curtains can mount on purlins or structural members, but do not require a specific beam. All are supplied with safety key operated electric motor with height limit settings. Motors include switchgear with dual key system so motors can not be reversed and burn out. Safety break arrestors are standard.

They are extremely low maintenance and a wide range of colours are available in both the Flexivide solid Vinyl and Fleximesh mesh. Both is approved Flame resistant, antibacterial and fungi resistant to meet requirements of ASTM E-84 Class A Rating.

The pick up cables are aircraft grade steel as opposed to nylon cord so they do not stretch and can not easily be cut. The retraction mechanism is a simplified top axle and spool arrangement, eliminating complicated cable runs and the need for multiple pulleys which are high maintenance.
