HEAVY METAL BASKETBALL GOAL

Heavy Metal Playground Goals

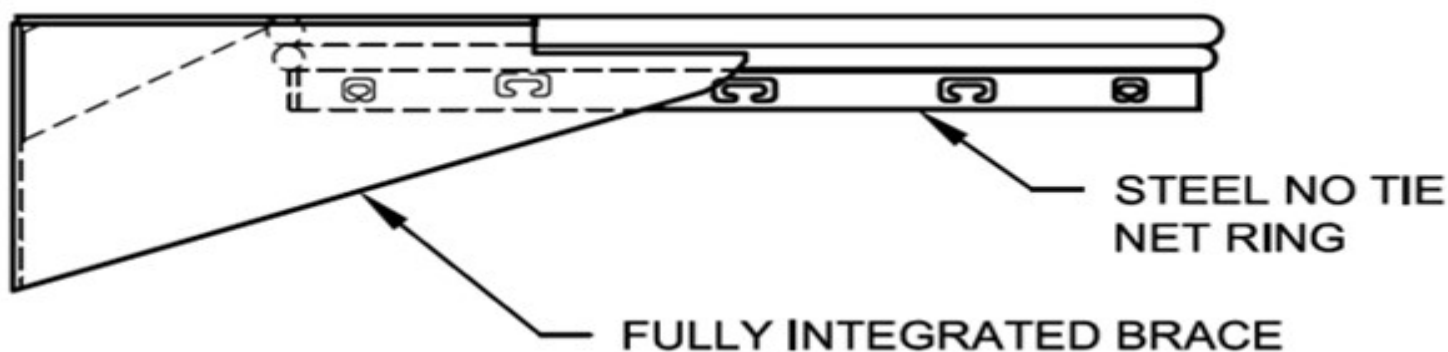

The Heavy Metal playground goal is designed for ultimate durability in all high abuse situations. This goal comes with a life time warranty, a double rim for extreme strength and an additional full wrap around wing bracing. The net holders are milled into this brace and can never snap off rendering net attachment impossible, or worse yet leaving a dangerous shard of steel for players to cut themselves on.

Architectural Specification:

The Heavy Metal goal shall be constructed with an official sized 450 mm ring of 20mm diameter with an additional support ring of 16mm diameter. A continuous milled in no-tie ring with twelve net holders shall be welded to the lower support ring. Welded net hooks will not be permitted.

Goal shall be made with high carbon/manganese materials for high strength. Back plate shall be 5 thick and 20 mm wide x 175 mm long. Brace shall be 5mm thick fully welded to the goal ring and back plate. An additional 5mm thick stiffener plate shall be welded to the centre of the back plate for added strength.

Goal shall have a durable orange powder coated finish and come complete with nylon no whip net and zinc plated mounting hardware.

Specifications may change with out notice
