COMPETITIONS**

The Herculan SR Olympic system is an environmentally-friendly, seamless system with point-elastic properties. Herculan SR Olympic complies with the current European requirements according to EN 14877. The system is included in the IAAF list of approved and classified athletics tracks and is suitable for both national and international competitions. High-quality Herculan SR Olympic is a seamless 3-layer system of high performance, strong, flexible polyurethane self levelling layers.

High-performance, light-weight EPDM granules are embedded into the first two layers to provide the right level of comfort and the unique performance level of this system. The final layer is covered with coloured EPDM granules. Herculan SR Olympic is water-impermeable, spike-resistant, UV-resistant and weather resistant. The system is durable and suitable for use in all weather conditions.
