THE SPORTS FLOOR FOR TOP PERFORMANCE

The Herculan SR Sprint system is an environmentally-friendly, seamless, spike-resistant system with point elastic properties. Herculan SR Sprint complies with the current European requirements according to EN 14877. The system is included in the IAAF list of approved and classified athletics tracks and is suitable for both national and international competitions.

The high-performance, seamless Herculan SR Sprint system consists of a rubber underlayer in-situ installed, to which a strong, flexible, polyurethane poured layer is added that is covered in coloured EPDM granules. Herculan SR Sprint is water-impermeable, spike-resistant, UV-resistant and weather resistant. The system is durable and suitable for use in all weather conditions.
