

Junior Portable Backstop System

Play like a little pro at the International Arena on a mini backstop system.

The Junior Portable Backstop is designed to provide rugged durability for small primary schools, home, club or side court training use.

No installation required or the need for ground inserts or penetrations.

Heavy duty steel construction.

1200mm x 800mm clear acrylic backboard with rounded corners.

Full size fixed ring mounted via direct goal design.

Easily adjusts from the low height of 2100mm, past the regulation heights for junior of 2600mm and senior height of 3050mm. Adjustment is aided by a unique spring assisted mechanism.

Unit moves on four castors and is set in place with the flip of the lever.

Folds down for compact storage.

Base is fully padded and requires at least 115kg of ballast. (Ballast not included but bags are, to store Pavers for Ballast inside).

Not recommended for main court use or dunking activities.

Current as of 1 June 2010
