## INCLUSIONS

Mesh Top and Vinyl Bottom

Electric Motor

Limit Switch

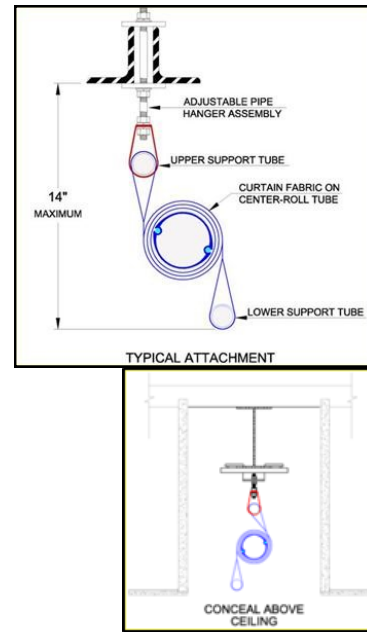

## FEATURES

Custom made system with choice of colours and sizes

## PRODUCT CODE

CURT-ST

Specifications may change with out notice  
REV 2 06/12/2011

The Stadia Centre Roll dividing curtain range is the most advanced system currently available in the world.

The Centre Roll system is completely free of troublesome retractor cables, meaning the curtain is sleek, clean and without trip points in comparison to older designs.

The curtain retracts onto a centre roll, and at twice the speed of comparable models, and the motor is fully concealed within the curtain adding to the aesthetic appeal. The system is equipped with a safety break, thermal motor cut out and dual key winch operation to prevent burnout if direction is immediately changed. Once retracted, it stores more compactly than any other system available.

These systems can be mounted to a structural beam or off purlins as required or concealed.

They are extremely low maintenance and a wide range of colours are available in both the Flexivide solid Vinyl and Fleximesh mesh. Both is approved Flame resistant, antibacterial and fungi resistant to meet requirements of ASTM E-84 Class A Rating.
