

## Wall Mount Practice Backstop

Our two different Wall Mounted Practice Backstop systems provide the strongest wall mount structure available for facilities looking for practise backstops. With a choice of either a 5 point wall mount system with a 3/4 size fan shape Essential fibreglass backboard and essential ring or a six point wall connection and a standard essential full size fibreglass backboard. Projection of 900mm as standard and these are fixed, i.e. do not fold back.

Unlike other traditional models with lesser connection points, the *compression* and *tension* loads exerted by the backboard is balanced.

Ideal as a training or practice backstop on the side of the main court or for junior players in school multi purpose halls.

Like international FIBA systems, the BB-ESWP5 has a "direct mount" design where the goal bolts through the backboard onto the support structure.

- Standard 3/4 or full size Essential High Tensile moulded fibreglass backboard finished in a hard wearing gel coat.
- Standard essential fixed goal and net.
- Can be mounted at any height.
- Can be upgraded with our AAG height adjustor systems so then you can change the ring height from senior to junior heights and anywhere in between.
- Can be attached to support beams.

**Product Code:** **BB-ESWP5** - 3/4 size Fan board  
5 connection points.

**Product Code:** **BB-ESWP6** - Full size board  
6 connection points.
