

## BADMINTON Essentials System

Our **Essentials T Base Badminton** posts have redefined the T base concept.

These posts are a hinged design so they can fold flat for easy and cost-effective transport and storage, and come complete with non marking wheels to allow easy tilt and roll deployment to speed up set and strike times, and reduce the risk of damage to the floor. Also light enough to carry in one hand.

Secured to the ground to a floor plate, the threaded bolt connection adds greater security than key plate designs of the past, and greater stability of the post when in play.

Full competition net tensioning is possible with this design, and they also include a moulded plastic cable guide on the top of the post with a deep groove to minimise the risk of the cable popping out in comparison to dented steel caps.

The posts are made from heavy duty steel and are supplied with a durable powder coated Red finish. Supplied flat pack with the floor lockdowns.

**Inclusions:**  
T Base Badminton Post  
Net

**Product Code:**  
AVS-BMEST
