

Netball

Essentials Netball Post

Inclusions:

75mm steel fixed netball post
Net

Optional extras

Padding

“The Essentials Netball Post system has set a new standard for heavy duty Netball posts. Utilising a 75 mm square steel upright, these posts are already stronger than normal outdoor posts.

These posts are then **Hot Dip Galvanised** for ultimate rust resistance, and then finished with an additional white powder coat layer for added protection, visibility and good looks.

The goal is made from a rolled 18 mm solid steel bar (and not hollow tube) and includes extra strength net hooks, designed not to bend should they be stressed. The goals are bolted to the post into internal nuts so there are no dangerous bolt protrusions out the back.

The system incorporates our exclusive Wedgelock sleeve design, developed by engineers through the use of advanced geometric modelling to reduce the movement of post when in the sleeve. This post movement has long been a complaint for Netball players and coaches, and by reducing this we can improve post stability.

The system is supplied with sleeves and caps as standard inclusions, however, can also be concreted directly into the ground.
