

ESSENTIALS

3 X 3 PORTABLE BACKSTOP

A sturdy 3x3 basketball system designed specifically for 3x3 portable competitions.

Designed to keep costs down, the system is non-rust, and intended to be used either as a temporary portable backstop which can be transported from venue to venue in a van, ute or trailer, or can be used in a venue full time.

- Fitted with adjustable feet, this system can be demounted and flat packed for easy freight from venue to venue, and quickly set up on site for play.
- Supplied with a ½ size backboard, the system can be set at senior or junior height and has a full 1.2m clearance off the court in the full height position so the base is not on the court.
- When ballast (not included) is added, the system can withstand rugged play and dunking, and is stable in strong winds.
- Options including padding
