

ESSENTIALS

ROOF MOUNT BASKETBALL

Essentials Roof Mounted Basketball Range is designed to provide a cost effective version of the International FIBA level systems used in big stadiums for venues where the top line product is not required.

- Designed and engineered specifically to provide flexible installation of a quality product with lower costs.
- Forward, Rear or Side folding installation to suit any space.
- Triangular mast support for resistance to sway.
- Mechanical locking arm to hold system in position (not gravity reliant).
- Direct mount goal connection to centre mast providing complete structural strength.
- A mounting height of up to 9M on standard systems (higher systems can be customised).
- Full size 50mm reinforced fibreglass backboard for improved strength and ball rebound.
- Supplied standard with electric winches.
- Tested and Certified for International FIBA Level 3 Basketball Competition, Education QLD Basketball Specifications and Australian Design Standards.
- Ideal for use in schools, recreation and community centres

Upgrades such as spring loaded rings, backboard padding, height adjustment systems, safety straps are also available.

Please note custom configurations require longer lead times and additional costs and all installations require structural **SIDE FOLD** steel beams to already be in place.
