

# HEAVY METAL BASKETBALL GOAL

The Heavy Metal playground goal is designed for ultimate durability in all high abuse situations.

This goal comes with a life-time warranty, a solid steel double rim for extreme strength and an additional full wrap around wing bracing.

Net holders are milled into the brace and can never snap off, rendering net attachment impossible, or leaving jagged steel to slice arms on.

## Architectural Specification

The Heavy Metal goal shall be constructed with an official sized 450mm ring of 20mm diameter with an additional support ring of 16mm diameter.

A continuous milled in no-tie ring with twelve net holders shall be welded to the lower support ring.

Welded net hooks will not be permitted.

Goal shall be made with high carbon/manganese materials for high strength.

Back plate shall be 5mm thick.

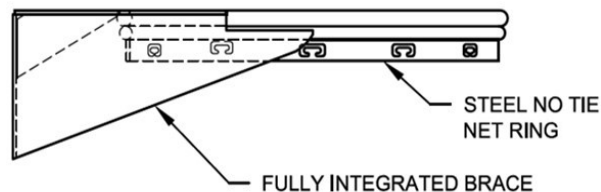

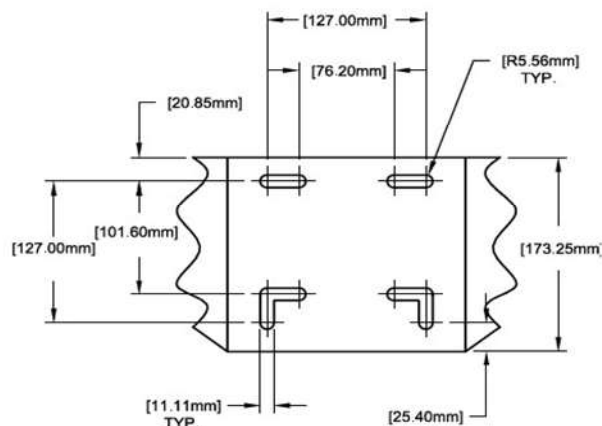

The wrap brace shall be 5mm thick fully welded to the goal ring and back plate.

An additional 5mm thick stiffener plate shall be welded to the centre of the back plate for added strength.
